Subject: Applying for the post of Technology (IT) Analyst, Summer Internship

Respected Sir/Madam,

I wish to apply for the position of Technology (IT) Analyst at Credit Suisse. I was made aware of the aforementioned role through the Campus Recruitment process.

I am currently studying in the Third Year of B.E. (Computer Engineering). For the past 3 months I have been working as an intern at Pykih, a company specializing in data visualisation, where I picked up valuable skills in the field of web development, particularly in JavaScript and React. I was also exposed to the various methodologies practiced by companies when developing code for distribution. I have also developed an Android application for an e-commerce start-up called Find Out. My experience as the Vice Chairperson of Computer Society of India as well as the organizer of the college Model United Nations has helped me gain experience in dealing with people and in working effectively in teams.

I am confident that my extensive work experience, team management experience and technical skills will enable me to work efficiently in the corporate environment provided by Credit Suisse which has a rich history of success and innovation in the banking sector.

I would like to thank you for your time and consideration and I hope that you will grant me the opportunity to work in your company.

Sincerely,
Aditya Desai
